Push, Lift and Dump Capacity for Handling Bulk Commodities

IMAC Bulk Scoops replace dozer blades on Wheel Dozers to **Push, Carry, Lift and Dump** in the management of **bulk materials** such as **Coal, Woodchips, Sulfur and Potash**.

They offer three advantages over blades in maintaining stockpiles:

- 1) Increased capacity when dozing
- 2) No spillage when carrying
- 3) Ability to lift and dump into chutes

Consult IMAC for special Moldboards and Push Groups for dozing applications.

Model	Type	Width Inches	Carry Capacity yds ³	Push Capacity yds ³	
WD10	CS12	Coal	147"	12.0	24.0
	WCS20	Woodchip	147"	20.0	40.0
WD30	CS18	Coal	158"	18.0	36.0
	WCS30	Woodchip	158"	30.0	65.0
WD50	CS27	Coal	169"	27.0	55.0
	WCS45	Woodchip	169"	45.0	90.0
WD60	CS40	Coal	216" (proposed)	40.0	80.0
	WCS65	Woodchip	216" (proposed)	65.0	120.0

Specifications subject to change without notice. Consult IMAC with your specific needs.

IMAC Scoop Packages include the push arms, dump/tilt cylinders and lift cylinder tower and cylinder assembly. They are made to attach to the standard push beam however an optional IMAC lightweight push beam is available to reduce weight on the front axle. Radiator guards and light pole extensions can be added for increase efficiency.
