

Uni-Joint BLADE & PUSH GROUP

A *CLW* Company

www.imac.ca

Replaces Conventional K-Brace Push Group to Eliminate 7 Wear Points

IMAC's exclusive Resilient Uni-Joint permits movement between Push Group Members

Blade shown dismounted and laying on ground ahead of tractor.

Blade mounts closer to machine for lighter front end or can be supplied with longer push arms for greater reach.

Available for D65, D85, D155, D275, D375, D475

IMAC's UniJoint Push Group includes 2 Push Frame Halves, 1 Fixed Strut and 1 Manually Adjustable Strut. Specify each optional component below required at time of order:

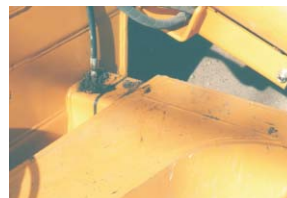

- Tilt Cylinders - Single Cylinder or Dual
- Choice of Moldboard
- Mounting Trunnions to Dozer - (IMAC Replaceable Ball Trunnions)
- Ball Connections to Back of Blade
- Central Lubrication

Optional IMAC Trunnion Balls featuring a Replaceable Ball

**For work in
Abrasive Conditions**

**Proven in use
over THOUSANDS of hours
in EXTREME climates!**

Ball Joint Connections with Hardened Socket Liners and Optional Central Lubrication
